DETAILED ACTION

Claim Objections

1. Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 5 fails to further limit the parent claim because it is not directed to the invention of the parent claim. This claim is directed only to a polymeric adhesive, yet the parent claim recites an article comprising an adhesive between two elements. A proper dependent claim must include all of the limitations of the parent claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Siedle et al. (WO96/26967).

The reference shows in at least Example 41 a composition comprising a polypropylene film bonded to glass using an adhesive comprising the propylene

homopolymer described in Example 36 (see also Tables 2 and 3). The rubbery polypropylene has no crystalline phase, Mw=500,000 and Mn=228,000. Further, the reference states at page 14, line 23 through page 15, line 5, that these types of atactic polypropylenes have isotacticity of about 6%. The cited reference disclosure contains all claimed limitations.
